Working together to improve your care

To give you better care, we are working with Island Health to add more staff to our team.

Today, you may be seen by a nurse, social worker, pharmacist, or other team member employed by Island Health.

To care for you, they will access your chart, just like other team members in our clinic. On occasion, Island Health staff may also access your chart to review their employees' work.

For more information about the information we are sharing, please ask reception for a brochure or visit www.fpscbc.ca/info-sharing.
