

Who is the Division of Family Practice?

“We are family physicians working together to improve primary care and achieve common health care goals.”

Our work is to improve local primary care such as increasing the number of family physicians in the community, improving care provided to patients while in hospital, and improving links between family physicians, nurse practitioners and community services.

Chilliwack

Division of Family Practice

A GPSC initiative

Our Projects

Hospital & Residential Care Programs

Chilliwack Physicians are working to ensure patients have access to care by a family physician during their vulnerable time in hospital or a residential care facility.

A GP for Me

Sponsored by the Government of BC and the Doctors of BC, we are implementing local A GP for Me strategies to improve access and attachment to your family doctor or nurse practitioner. This includes talking with residents about appropriate access to primary care services, and recruiting and retaining doctors. If you do not have a family doctor or nurse practitioner and want to find one, call the Patient Attachment Mechanism at 604-795-0034 or toll-free at 1-844-795-0034.

Healthy Kids Initiative

Framed by a health promotion message, Live 5-2-1-0, the Healthy Kids Initiative is solution-oriented and evidence-based. Collaborating with community partners and SCOPE, an initiative of BC Children's Hospital, we are working to make the healthy choice the easy choice for children.

Live 5-2-1-0 stands for: 5 or more vegetables and fruits every day, no more than 2 hours of screen time a day, at least 1 hour of active play each day and 0 sugar-sweetened drinks.

Community Engagement

The Division is working hand in hand with community partners, stakeholders and local services to increase awareness about Division programs and where, when and how to access primary care.
