

We want to hear from **YOU** TODAY! Panel Discussion
Feedback Handout

Welcome to ONE PATIENT ONE RECORD

ENVISIONING HEALTH INTEROPERABLE SYSTEM

ONE PATIENT, ONE RECORD

Dr. Douglas Kingsford

- HIGH EMR UPTAKE but NO OVERSIGHT
- THERE are LARGE IT PROJECTS UNDERWAY

CARE PLANNING

we want to make it more manageable

- MACHINE-READABLE D-A-T-A
- ACCESS for PROVIDERS & PATIENTS
- SEE the PATIENT JOURNEY

VIRTUAL SINGLE RECORD...

NO ONE HOLDS the WHOLE RECORD

with PATIENT and PROVIDER VIEWS (into the SAME RECORD!)

IN the SHORT TERM we are improving integration

- Secure Network
- Better sharing
- Improving Technical Standards

BIG DATA from small places

DR. WILLIAM CLIFFORD

When we are interested in ONE PATIENT at a time OUR CURRENT SYSTEM WORKS... but we need MORE STRUCTURED DATA to expand this

HEALTH RECORDS... there is constantly information coming in from many directions

There's a lot of information we need to COLLECT in a MEANINGFUL WAY

Data QUALITY matters! It requires GOOD STANDARDS!

OUR NORTHERN CORE CLINICAL DATA SET is GROWING

We are developing a UNIVERSAL SCHEMA and advanced CARE PLANS

They are more like JAZZ than an orchestra!

NORTHERN BLENDED FUNDING MODEL

We are paid for proper documentation!

We need to improve REVIEWING CLINICAL PERFORMANCE

What is MY ATTACHMENT? COMMUNITY ATTACHMENT?
